BY SAMMEGH TECHNOLOGIES

FULL STACK WEB DEVELOPMENT PROGRAM

TRAINING | INTERNSHIP | PLACEMENTS

ABOUT WEBORYX ACADEMY

Weboryx Academy is a forward-thinking initiative by SamMegh Technologies, a leading software development firm founded by a team of dynamic engineers with rich industry experience across various domains and technologies.

Since its inception, SamMegh Technologies has successfully delivered over 35 projects in just three years, catering to both domestic and international clients. Our core expertise lies in web and Android application development, and we pride ourselves on offering end-to-end consulting, development, and deployment services. Our mission is to empower clients by transforming ideas into scalable digital solutions—from Plinth to Paramount. Visit www.sammegh.com to know more..

Weboryx Academy is committed to bridging the gap between academic learning and industry expectations through its Full Stack Web Development Program. This flagship program is designed to offer a comprehensive learning experience, combining expert-led training, internship opportunities on live client projects, and 100% placement support.

With a proven track record of 13+ successful batches and over 3000+ students trained across India, Weboryx Academy has become a trusted destination for students aspiring to launch their careers in tech. Our curriculum is industry-aligned, focusing on real-world skills, tools, and technologies that are in demand in today's job market.

STATISTICS

13+ BATCHES

Weboryx Academy has successfully conducted 13+ batches of its Full Stack Web Development Program

5K+ HAPPY STUDENTS

Weboryx Academy has built a strong reputation for delivering quality education and career-focused training.

3000 STUDENTS PLACED

Weboryx Academy have successfully secured placements in top tech companies.

TRAINING

At Weboryx Academy, our training program is designed to provide a complete and immersive learning experience. Classes are conducted through expert-led live sessions, allowing students to engage directly with experienced trainers and clarify doubts in real time. Daily class links are shared in advance, and each session is recorded and made available through our Learning Management System (LMS)—so students can revisit the content anytime for better understanding and revision.

We provide comprehensive study materials, including notes, reference guides, and curated resources, to support your learning journey. To ensure consistent progress, students are given weekly assignments and mini-projects that reflect real-world development tasks. Additionally, we conduct monthly seminars and webinars featuring industry professionals who share valuable insights, trends, and career guidance—helping students stay aligned with the latest in tech and development practices.

INTERNSHIP

As part of the Weboryx Academy program, students will undergo a structured internship experience that mirrors real industry work. Learners will be divided into project teams, with each group assigned a dedicated mentor to guide them throughout the internship. Students will receive detailed project briefs, along with client introductions and background, to understand the scope and expectations of real-world projects. Regular client interactions will be scheduled to help students adapt to professional communication, understand client requirements, and get a feel for the corporate work environment.

Throughout the internship, students will be provided with wireframes, guided through the design and development process, and taught how to manage their tasks using JIRA, a popular industry-standard project management tool. This hands-on exposure helps them track progress, collaborate effectively, and meet deadlines—just like in a real company setting. At the end of the internship, students will be awarded an official Internship Certificate and an Experience Letter, adding strong value to their professional profile and increasing their chances of placement.

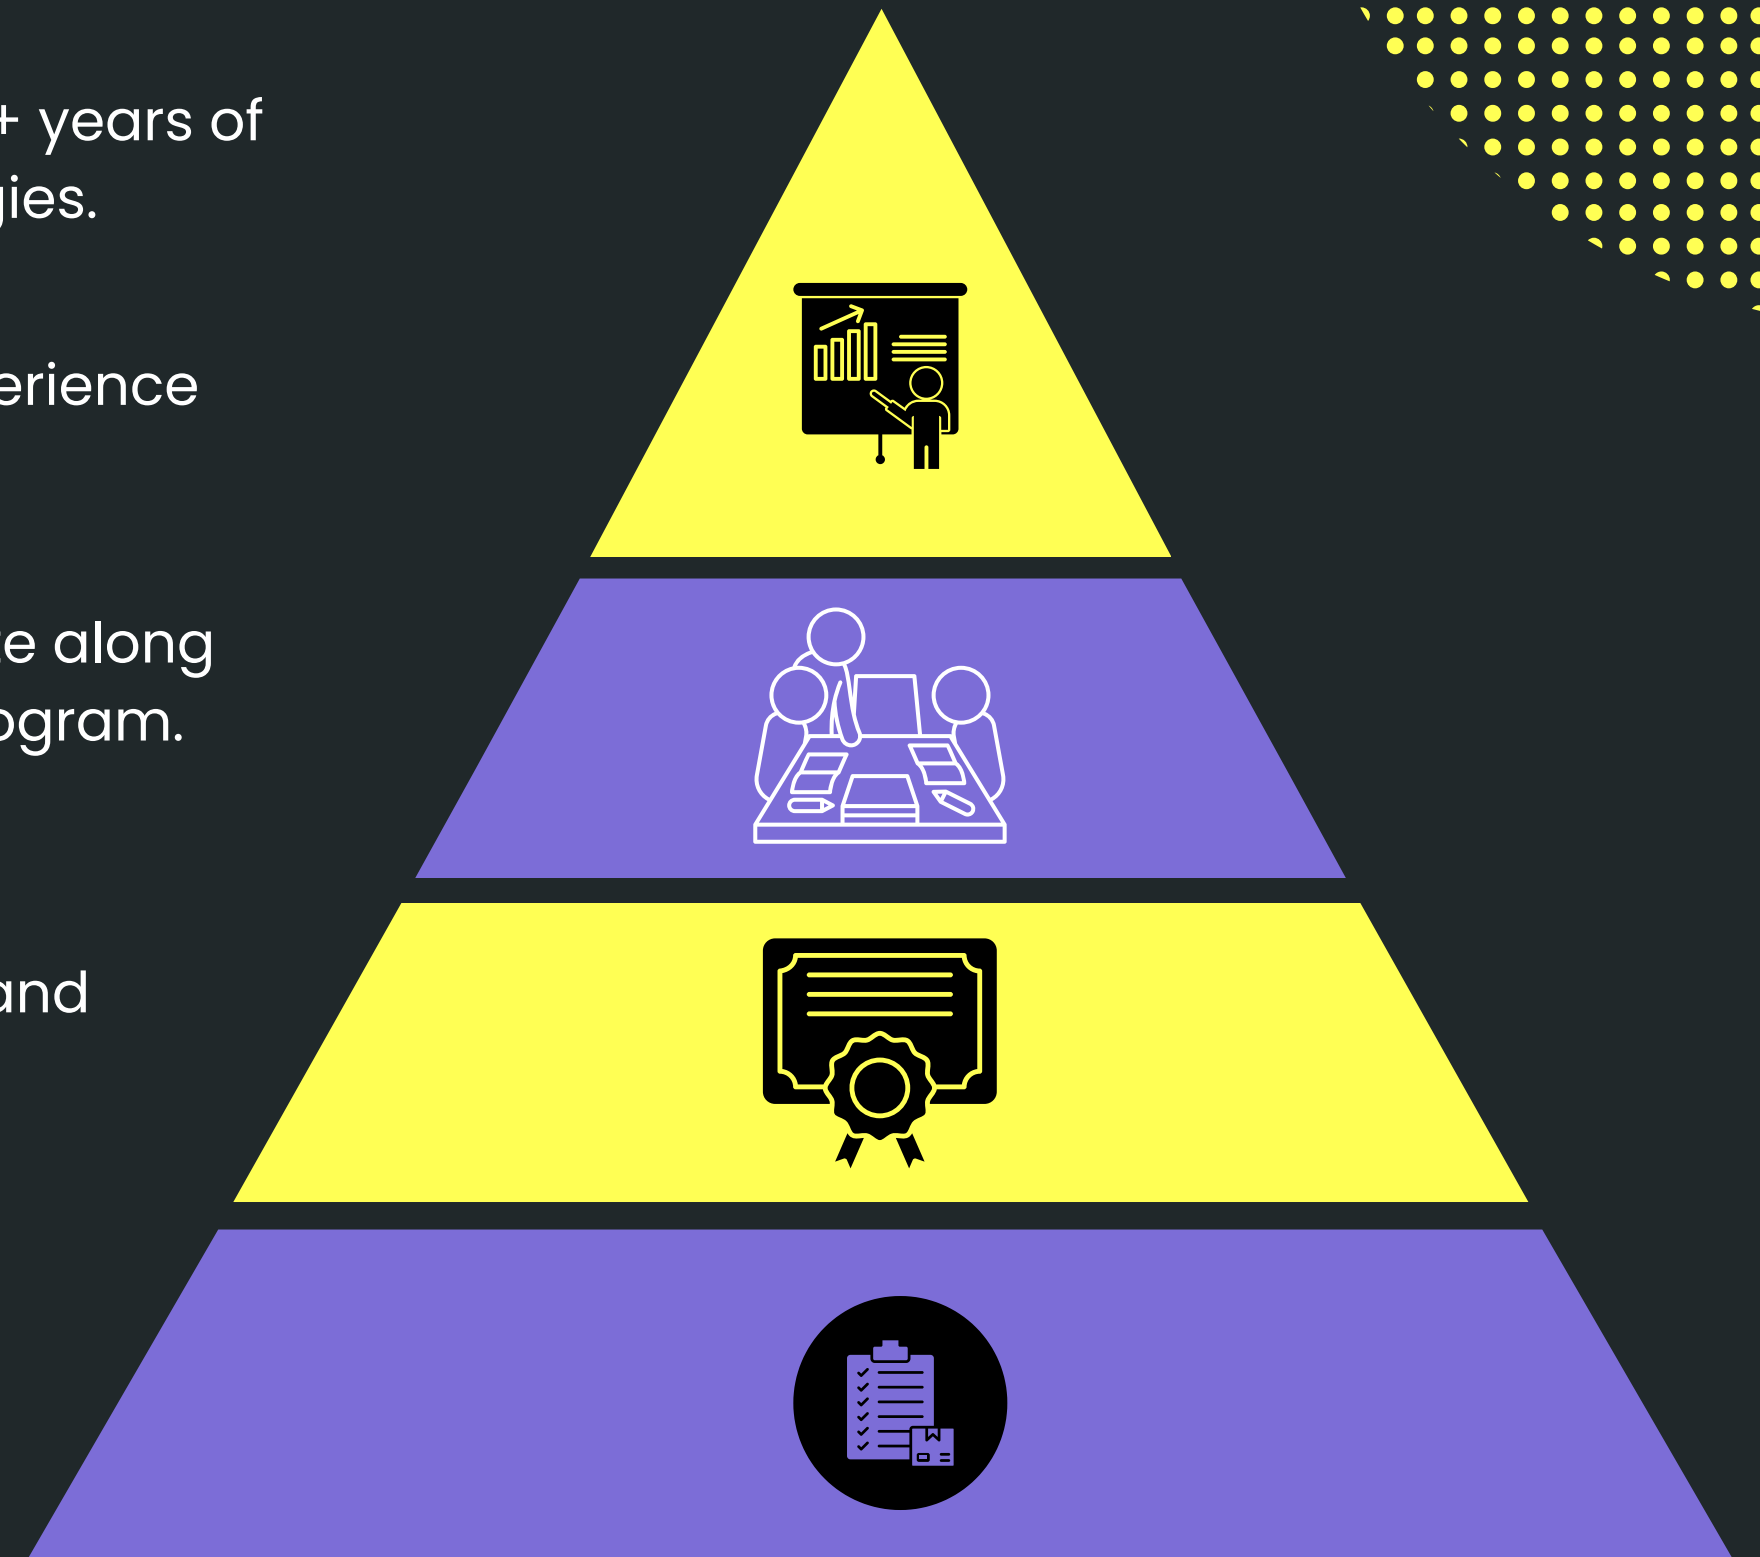

PLACEMENTS

At Weboryx Academy, we offer dedicated placement support to ensure our students are fully prepared to enter the job market with confidence. Our team conducts mock interviews, provides pre-set coding questions with solutions for hands-on practice, and trains students on resume building and LinkedIn profile optimization—key elements that help them stand out to recruiters. We focus not just on technical skills, but also on improving communication and interview readiness.

In addition, students get exclusive access to our in-house job portal, where verified openings are regularly posted by hiring partners. Through this platform, students can apply for jobs directly, track their applications, and receive updates on hiring opportunities. Our goal is to bridge the gap between training and employment, making the transition into the tech industry as smooth and successful as possible.

BENEFITS

- 01** Get live training from industry experts having 10+ years of experience in the IT world on trending technologies.
- 02** Get a chance to do internship i.e. hands on experience into real-time client projects.
- 03** You will receive Internship and training certificate along with Work Experience Letter at the end of this program.
- 04** Get placement assistance like resume building, mock interviews, pre-set coding questions etc. and an exclusive job portal for placements.
